METAL**POINT HYPERGUARD**™
Close the Door on Organized Retail Crime

Q

It seems that organized retail crime (ORC) is increasing and the technologies gangs can obtain, are sometimes defeating our traditional EAS solutions. How can we deter ORC gangs from targeting our store in the first place and if they do come into the store, how can we insure the safely of our staff and our merchandise?

A

ORC is a key concern for retailers and in 2013, the global cost of retail crime stood at $180.38 billion.* ORC gangs have attempted to defeat EAS systems using foil bags and stolen/illegal magnets to detach security tags regardless of the EAS technology installed. Now these illegal methods can be instantly detectable with Metalpoint HyperGuard. Metalpoint HyperGuard is a digital soft-driven solution designed to deter ORC theft and give retailers more information on where and what ORC threats are entering stores. Available as a stand alone solution to deter potential threats or integrated into existing EAS solutions - see below chart for options - providing a more discreet option.

✓ **ADVANCED DIGITAL 3D SENSING**
identifies metal in foil lined bags and magnets

✓ **LOCATION IDENTIFICATION**
identifies possible threats by entrance / exits

✓ **MONITORING OF MULTIPLE DOORS**
or aisles

✓ **SHOPPING CART EXCLUSION**
screens out unnecessary alarms

✓ **INTEGRATE INTO EVOLVE iRANGE**
or as a stand alone deterrent

✓ **DISCREET ALARM OPTIONS**
alerts can be sent to pagers, smart phones etc
